Polisoft Liveworld®

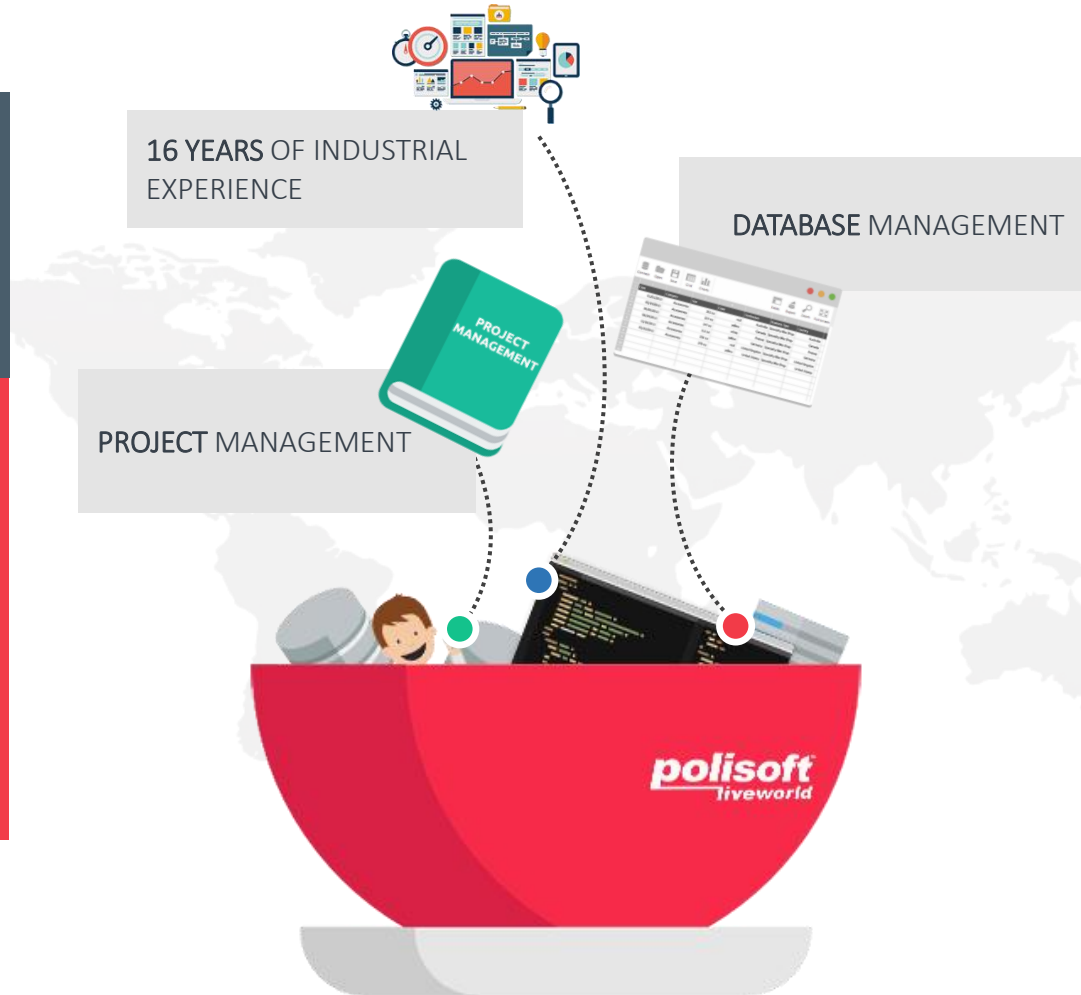

SHORTCUTS IN THE SOFTWARE

What is Polisoft Liveworld® ?

Polisoft **Liveworld**® was born with the idea of solving Project Management and Database Management problems that Polisoft Software Ltd. has been faced during its 16 years of operations.

Having difficulties to meet triple project constrains that are time, scope and budget, communication breakdowns between project manager and teams that cause project failures, facing problems with designing data architectural structure that results uncompleted projects due to early terminations can be given as examples.

Polisoft Liveworld® is not only a project management system nor database management system. It is a combination of both thus can provide you whatever you need to complete your projects on time, budget and scope by letting you to fully control your projects.

By using **Polisoft Liveworld**® you will be able to create, update, edit and delete MySQL based projects which is generally used database platform by software developers.

Polisoft Liveworld® **Code Generator** enables you to export all your project Works by one simple click as editable Visual Studio Project File that can be used to develop Webservices.

All your Webservice Documentation will be in one piece and ready to be used.

“We don’t want you to go through what been going through. We want to make life easier for you ”

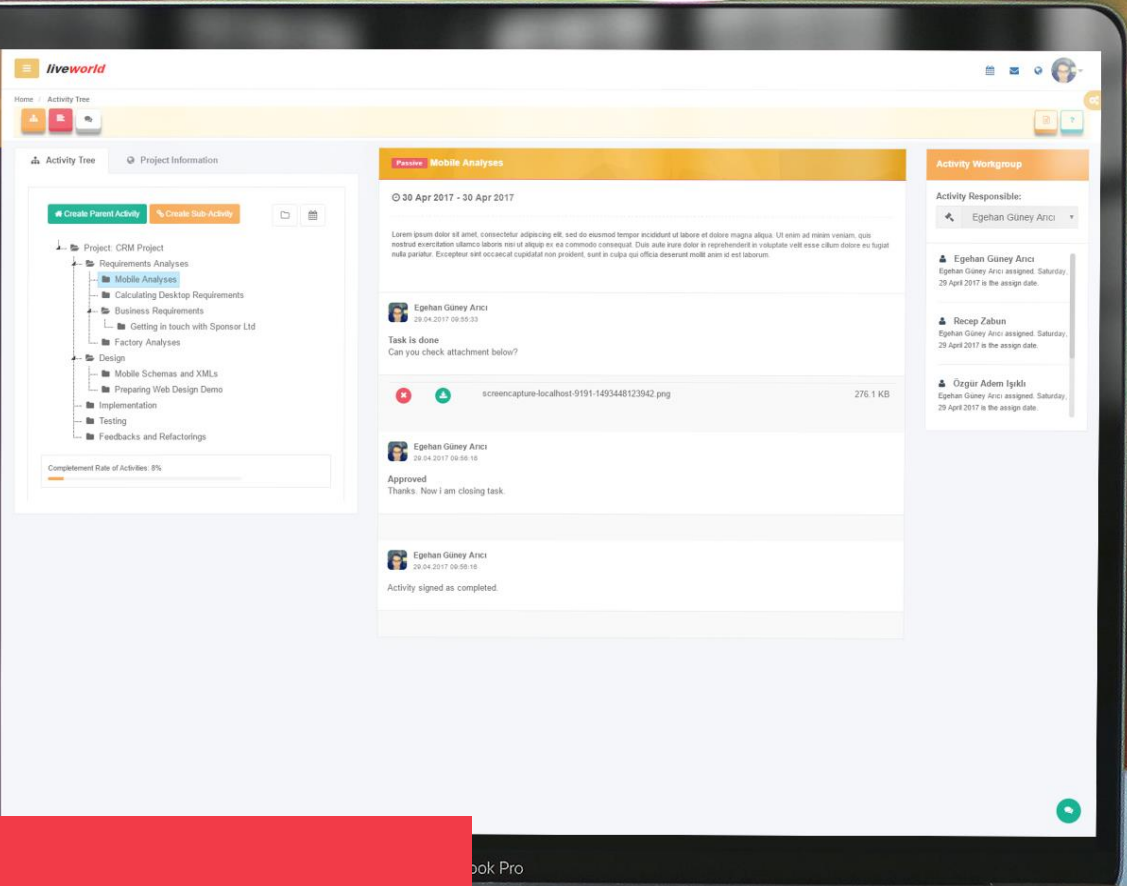

01 PROJECT MANAGEMENT

1st question is

Have you ever...

- Experienced any of your projects taking longer than scheduled?
- Experienced any of your projects going over budget?
- Had to redefine any of your project scope or specifications because of constant demands by the product owner and lost control of the project?
- Lost control in any project due to data anomalies and felt hopeless?

02 DEVELOPMENT

2nd question is Have you ever...

- Experienced communication breakdowns in any of your projects that caused your project to be delayed and overrun the budget?
- Experienced any data duplication problems and drowned in big data?
- Experienced any of your team members cause data distortions due to unnecessary additions and architectural problems?
- Had any of your software developers suddenly left the company and you had to restart again from scratch or terminate the whole project?

03 OUTPUT

3rd question is

Have you ever...

- Experienced any of your projects not meeting any specified requirements and thus failed?
- Needed to find any of your previous project documents and not succeed in finding them anywhere?
- Had to refactor your project work due to SDLC problems?
- Had to rebuild your webservices due to compability issues over and over again?

If your answer is “**YES**” any of above questions
Polisoft Liveworld®
is here to solve these problems for you!

		
	YES	NO
YOUR ANSWER FOR 1st QUESTION	✓	<input type="checkbox"/>
YOUR ANSWER FOR 2nd QUESTION	✓	<input type="checkbox"/>
YOUR ANSWER FOR 3rd QUESTION	✓	<input type="checkbox"/>

01 Project based Detailed User Permission Management

02 Prevent Data Creation & Modification Anomalies

03 Detailed & Effective Database Management

04 Easy and Secure Cloud Application

05 Easy and Effective Project Team and Document Management

06 Generate Project Works as Web Services

07 Generate Project Works as Code Outputs

08 Powerful Log Tracking System

09 Multiple Region Validation Support

10 Manage Unlimited Projects and User from One Platform

11 Create Multiple Language Data Control Systems and Components

12 Working Platform with Test and Real Environment Comparison

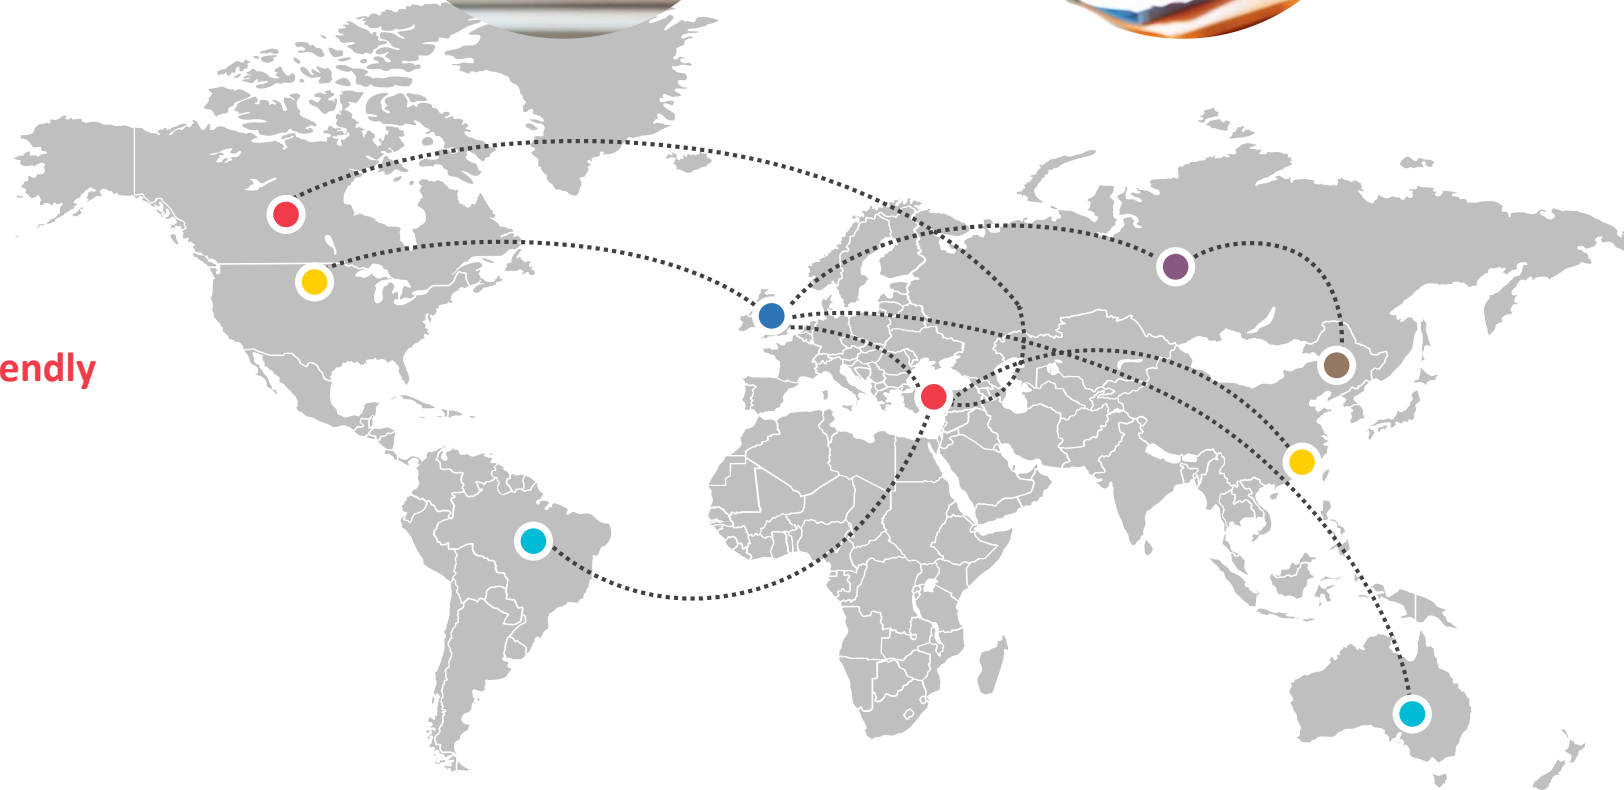

Easy and Secure **Cloud Application**

Worldwide Access

Highly Secured
(Compatible with OWASP rules)

Virtual Team Friendly

Fully Responsive

Manage Unlimited **Projects** and **Users** from one platform

Create and manage as much projects
and users as you want.

You can get Polisoft Liveworld® unlimited.

*“for your
unlimited
potential”*

Our project-based User Permission Management feature will provide necessary permissions for project team members to prevent uncontrolled data changes and unnecessary data access.

Project Roles

We can create project based roles and assign users accordingly to let them do only whatever we want them to do.

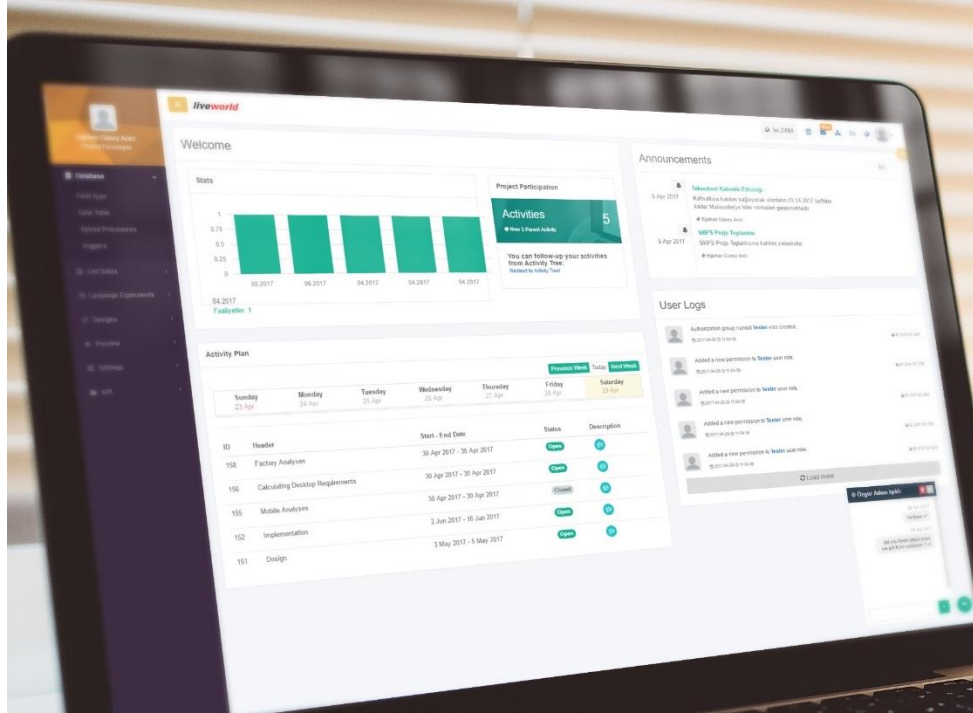

Detailed Permissions Management

We can give detailed access and modification permissions to any of our project team members depending on the project roles thus project team members will be limited to do only their assigned duties.

Easy and Effective Project Team and Document Management

Discuss and comment on the status of your projects in real-time by using Live Chat and project based message dashboard. Track project progress to keep the momentum going and achieve your project goals.

Easily create tasks for assigning to project team members and effectively manage your projects by keeping track of tasks that project team members assigned to.

You can divide activities into sub activities to create a correct schedule and effectively control your scope and work force.

Use document sharing to manage the files and procedures your team needs to follow and complete for our projects.

The screenshot shows the Polisoft Liveworld interface for managing database field types. The breadcrumb navigation is 'Home / Database / Field Type'. The main content area is titled 'Field Types' and contains a table with 11 rows of data. Each row represents a field type with columns for ID, Code, Name, Type, Reference, Group, Size, Default, List Type, and List. The table is filtered to show 11 results.

ID	Code	Name	Type	Reference	Group	Size	Default	List Type	List
1)	2	CREATED_AT	CREATED_AT	DATETIME					
2)	4	CREATE_AUTH_ID	CREATE_AUTH_ID	INT					
3)	15	DELETED_AT	DELETED_AT	DATETIME					
4)	16	DELETE_AUTH_ID	DELETE_AUTH_ID	INT					
5)	1	ID	ID	INT					
6)	3	UPDATED_AT	UPDATED_AT	DATETIME					
7)	5	UPDATE_AUTH_ID	UPDATE_AUTH_ID	INT					
8)	12	account	Account	VARCHAR	Standard Types	Standard Fields	30		
9)	14	name	Name	VARCHAR	Standard Types	Standard Fields	30		
10)	13	nation	Nation	VARCHAR	Standard Types	Standard Fields	255		User List
11)	17	Premiums	Premium Type	VARCHAR	Standard Types	Standard Fields	255		User List

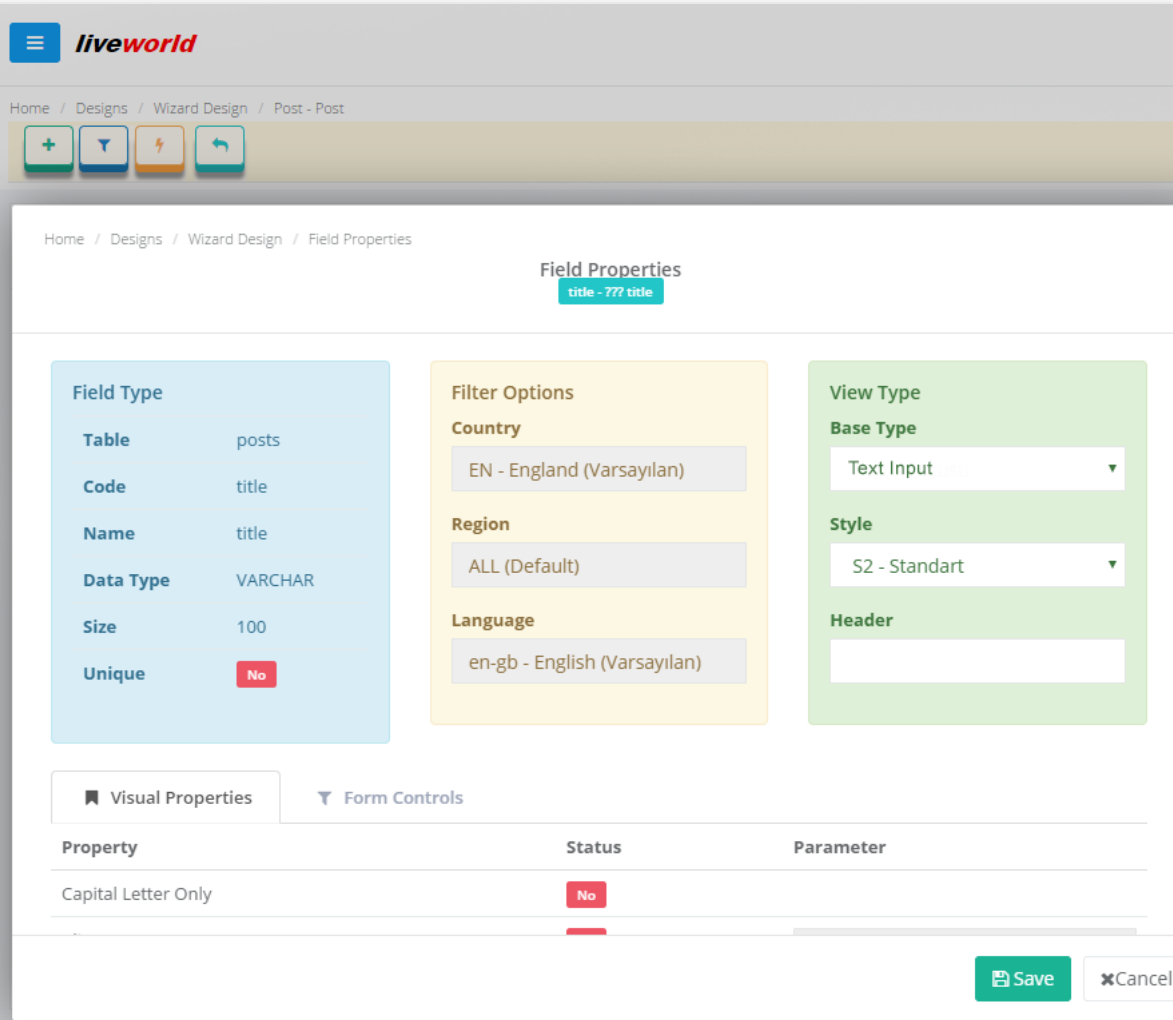

Total 11 data(s) found.

Manage your database easily with **polisoft liveworld**

Data Tables and Field Types Relationships

Data tables and field types can be created and controlled easily by the Project Manager according to his wish then to be accessed by software developers. It prevents us facing with complicated data and modification anomalies. You will not be dealing with complicated primary and foreign keys relationships, endless queries, database normalization and performance issues. Polisoft Liveworld® does them for you with only one click.

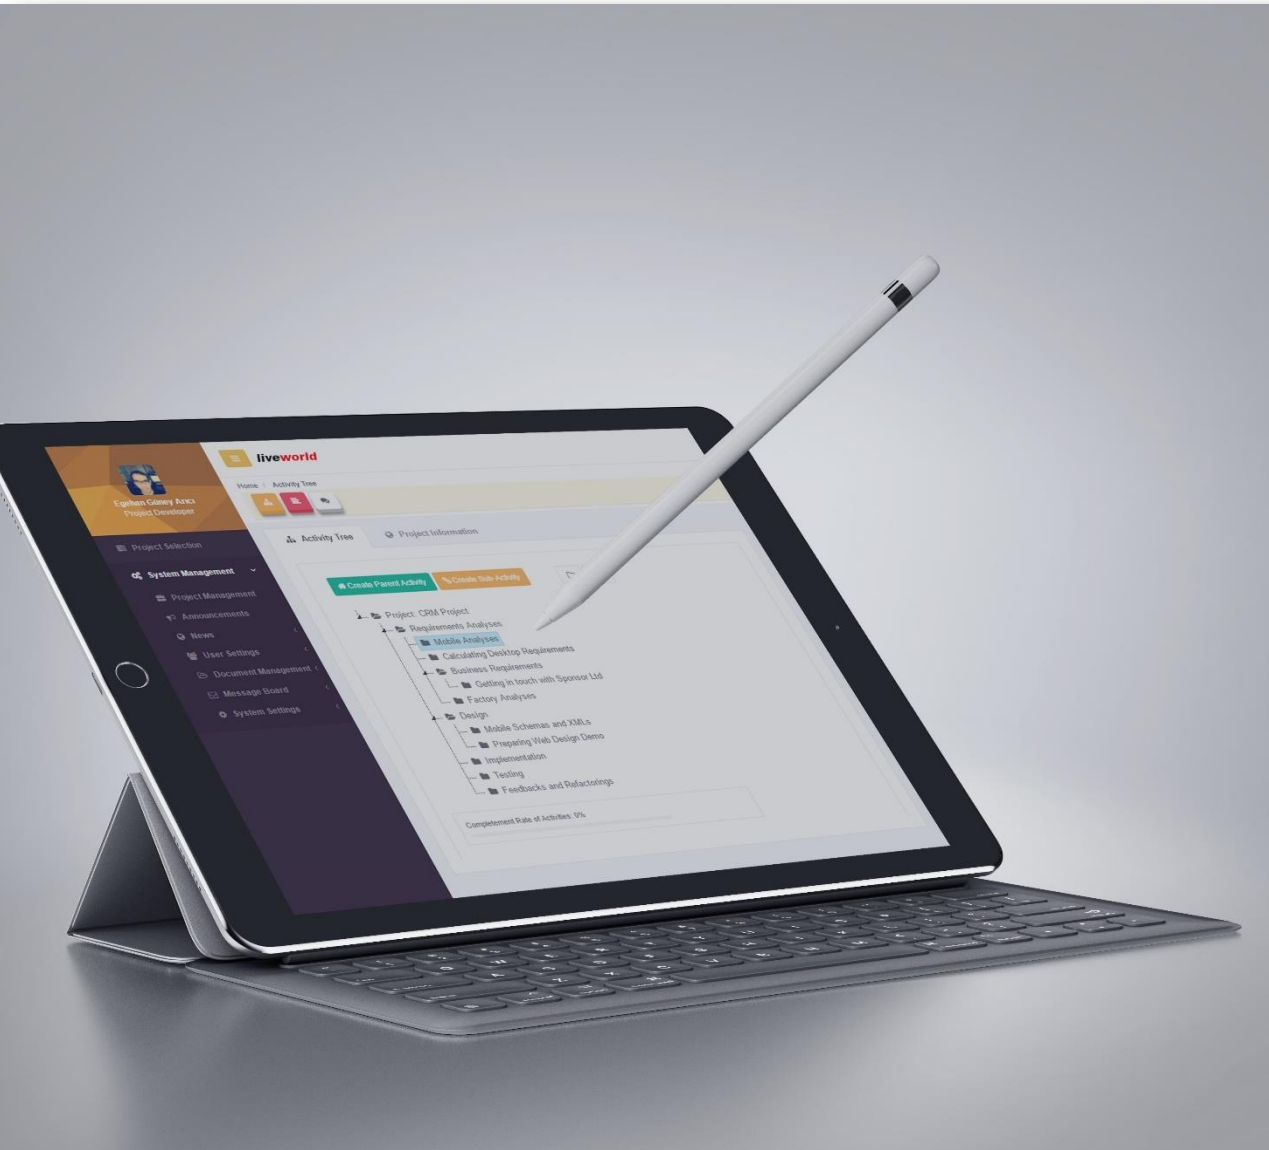

Manage your database easily with

Design Tools Ready for Previewing

Polisoft Liveworld® can easily assign Data Tables and Fields that created by Project Manager with Wizards, Forms and Menus by following simple steps.

And also we can generate ready to use webservice for software developers via Polisoft Liveworld® Code Generator that exports your project work as editable Visual Studio Project File.

Manage your database easily with **polisoft**
liveworld

Simple Viewing of Stored Procedures and Triggers

We can easily see and track Stored Procedures and Triggers in any projects by adding their functional descriptions next to them.

Polisoft Liveworld® enables us to know which stored procedures and triggers are used in particular databases.

Polisoft Liveworld® uses Cryptic Algorithms to protect sensitive data

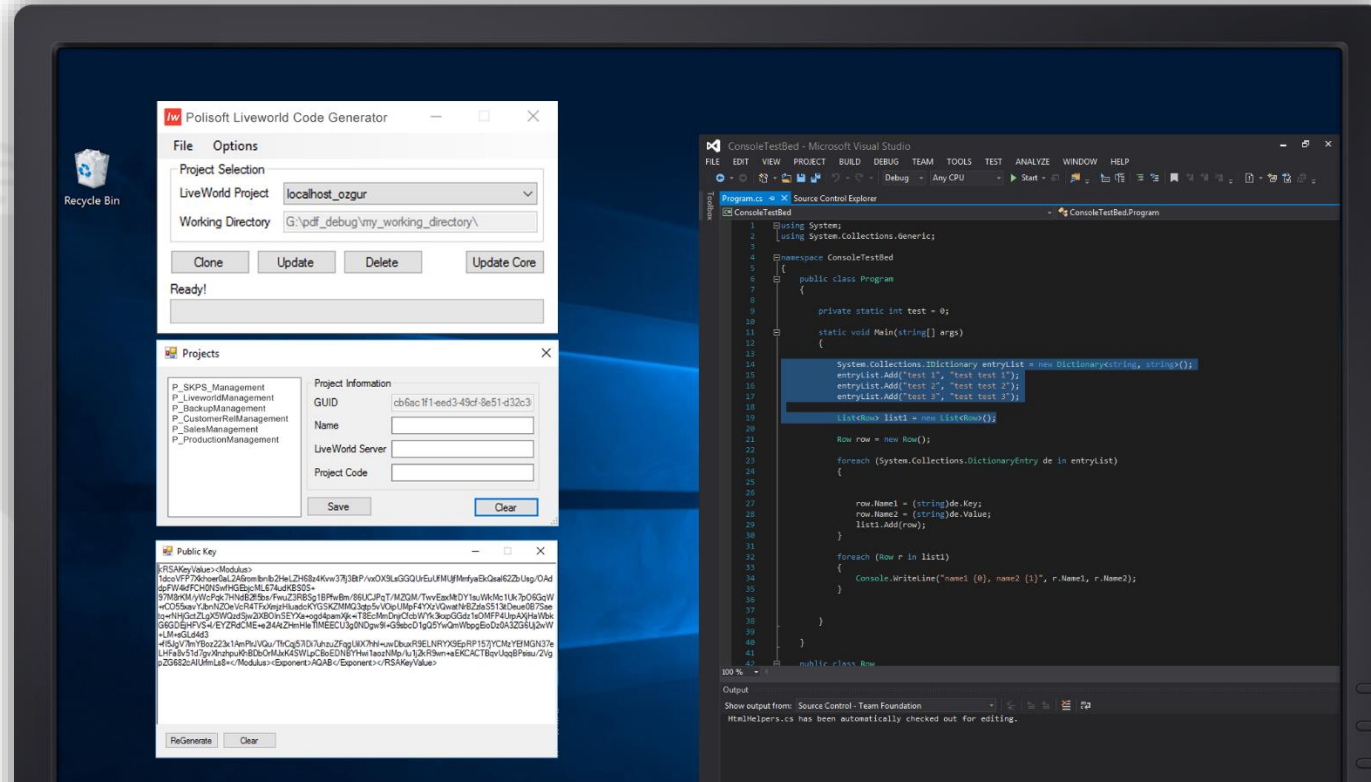

You can track user activities by extended logs

Methods are used to generate Visual Studio Project Files and Webservices are comply with OWASP rules thus fully satisfies industry standards

Generate Project Works as Web Services

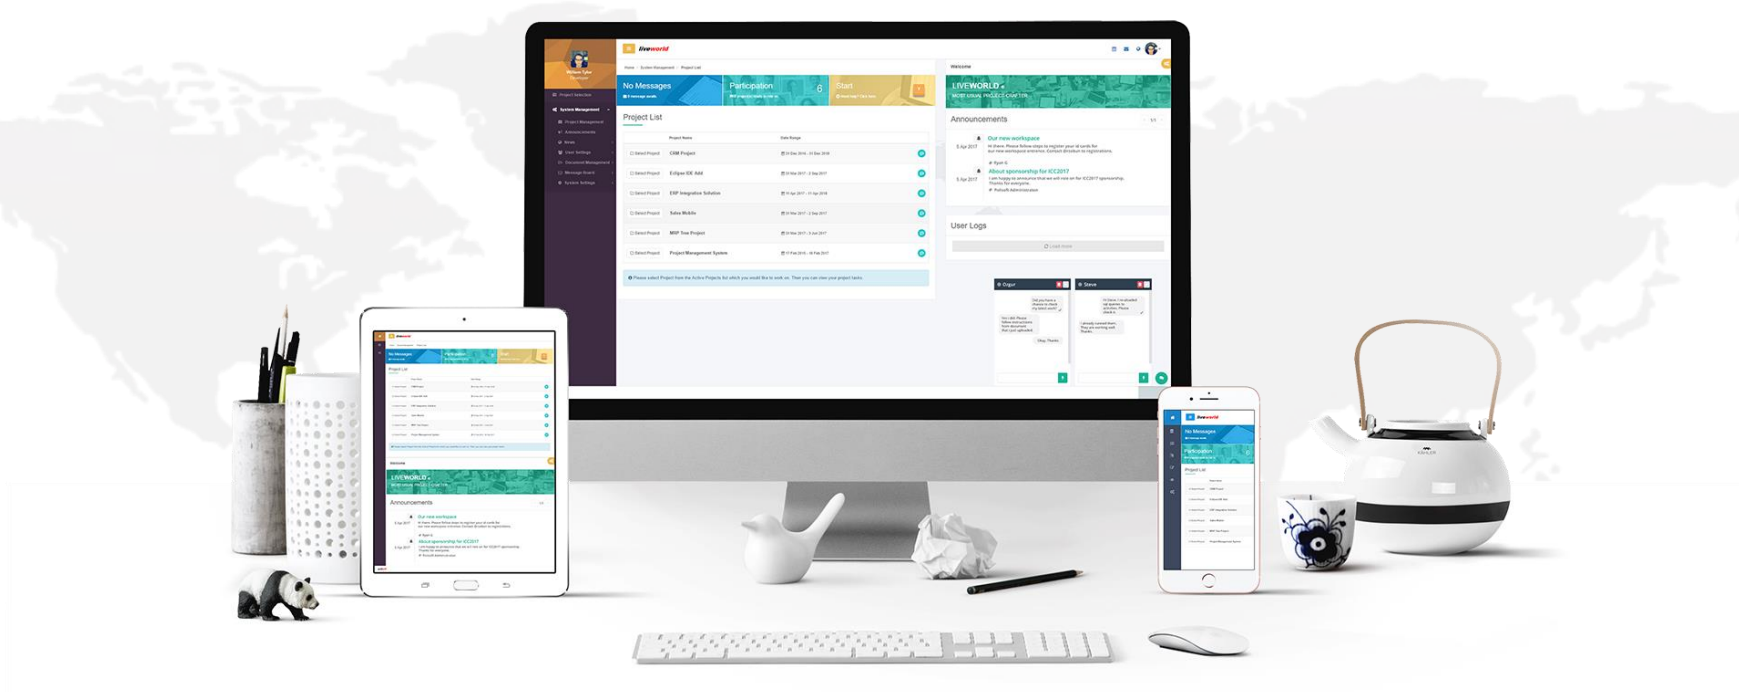

Polisoft Liveworld® Code Generator enables you to export all your project Works by one simple click as editable *Visual Studio Project File* that can be used to develop Webservices.

All your Webservice Documentation will be in one piece and ready to be used.

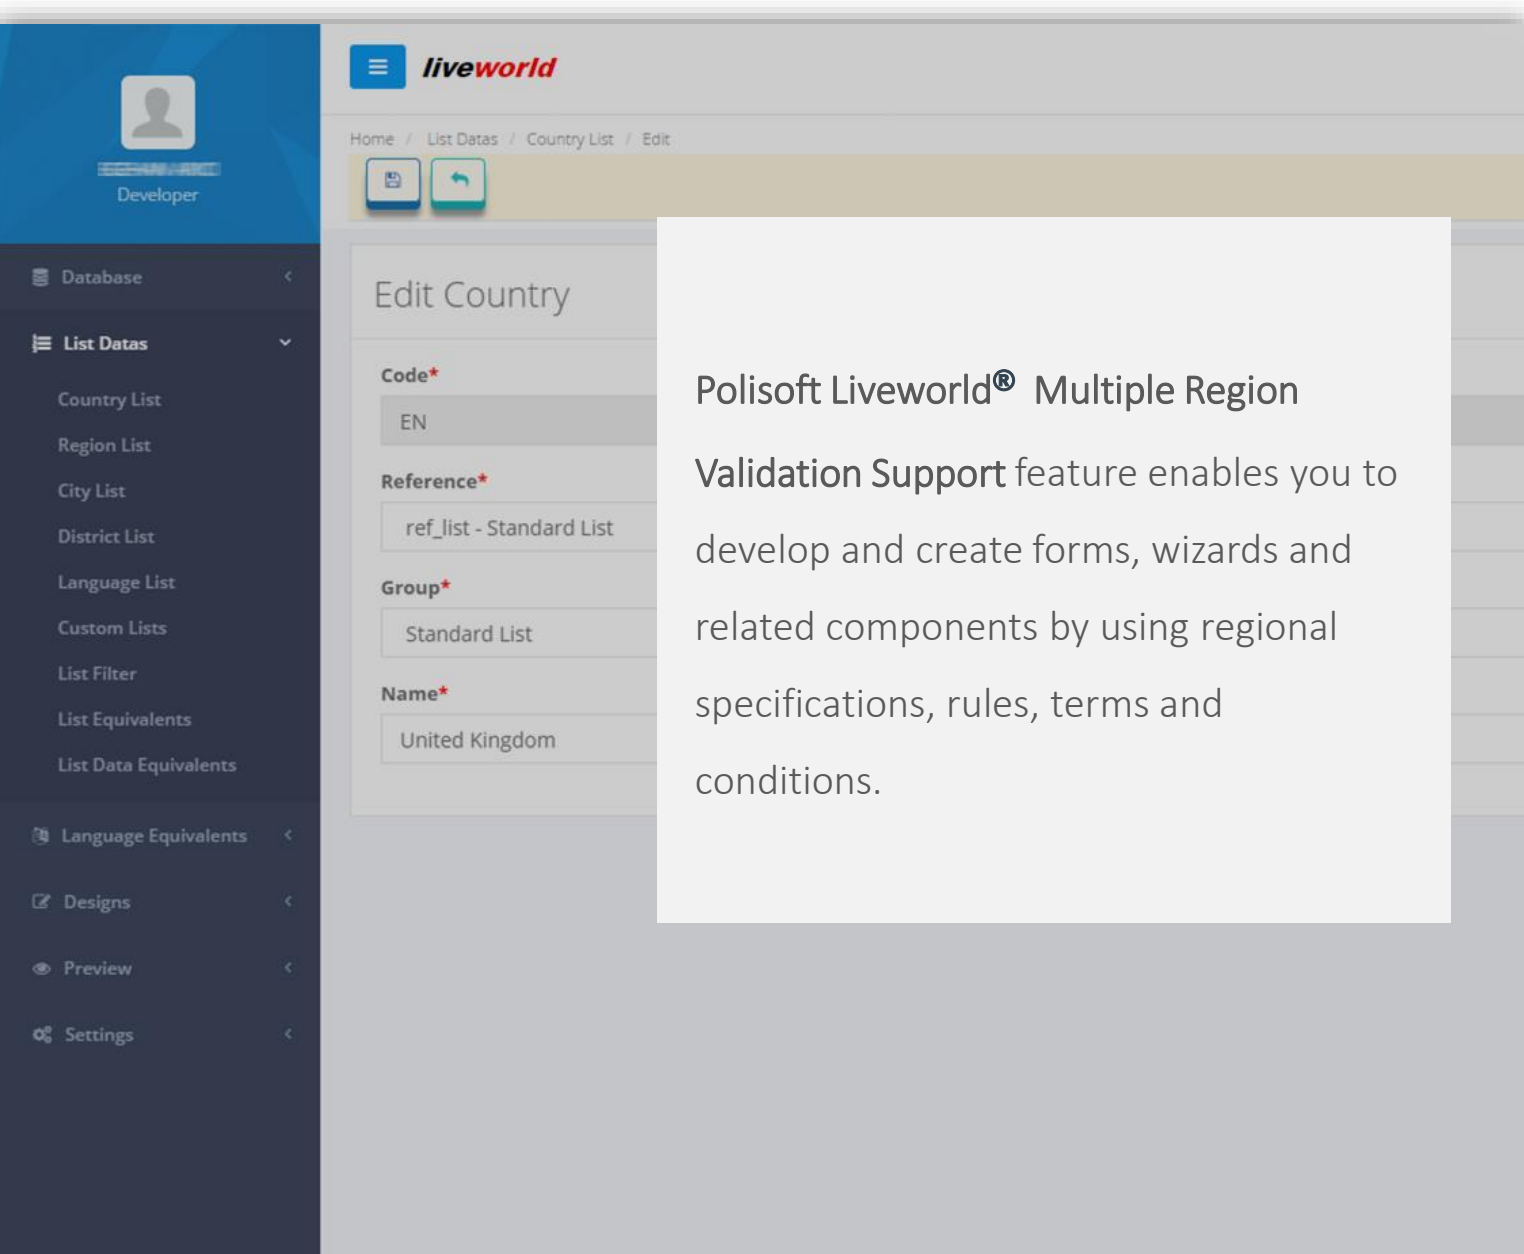

Generate Project Works as Code Outputs

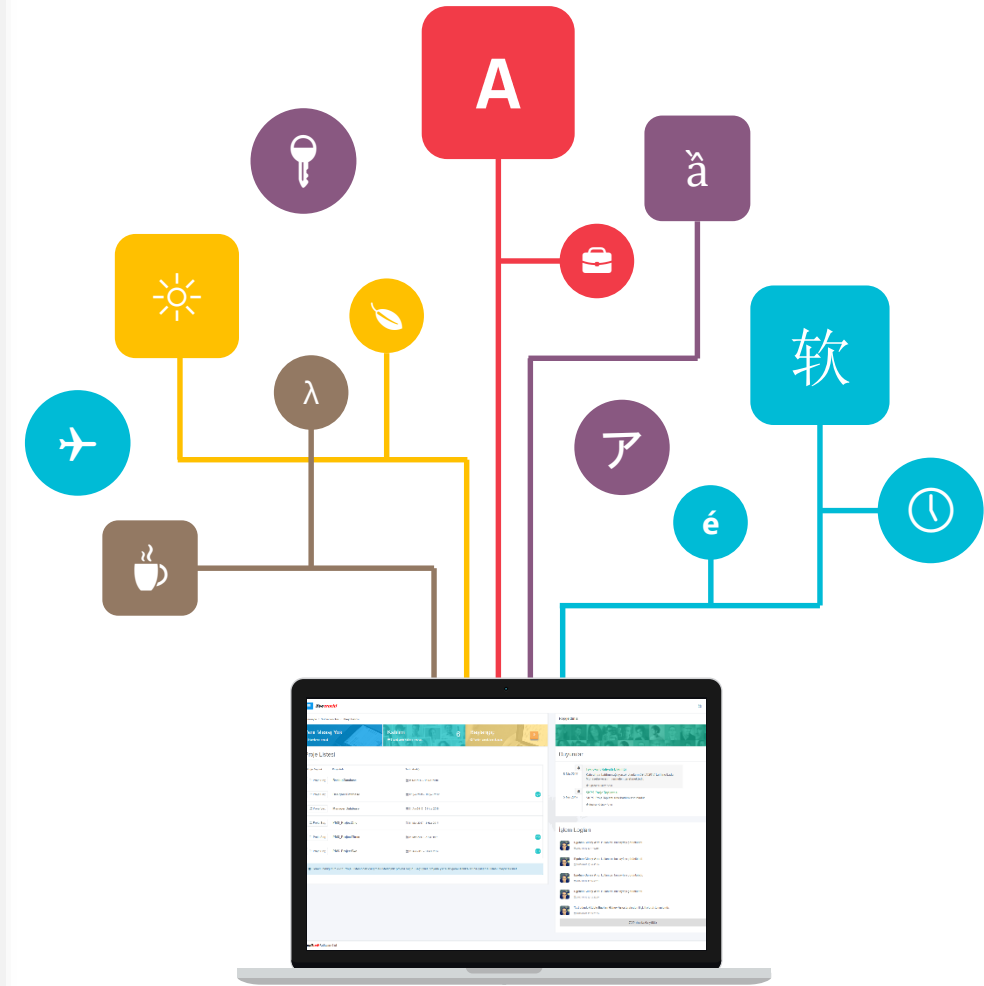

With Polisoft Liveworld® Code Generator app, you can take your project work to Visual Studio environment and ensure that your software development teams continue your business processes on Visual Studio.

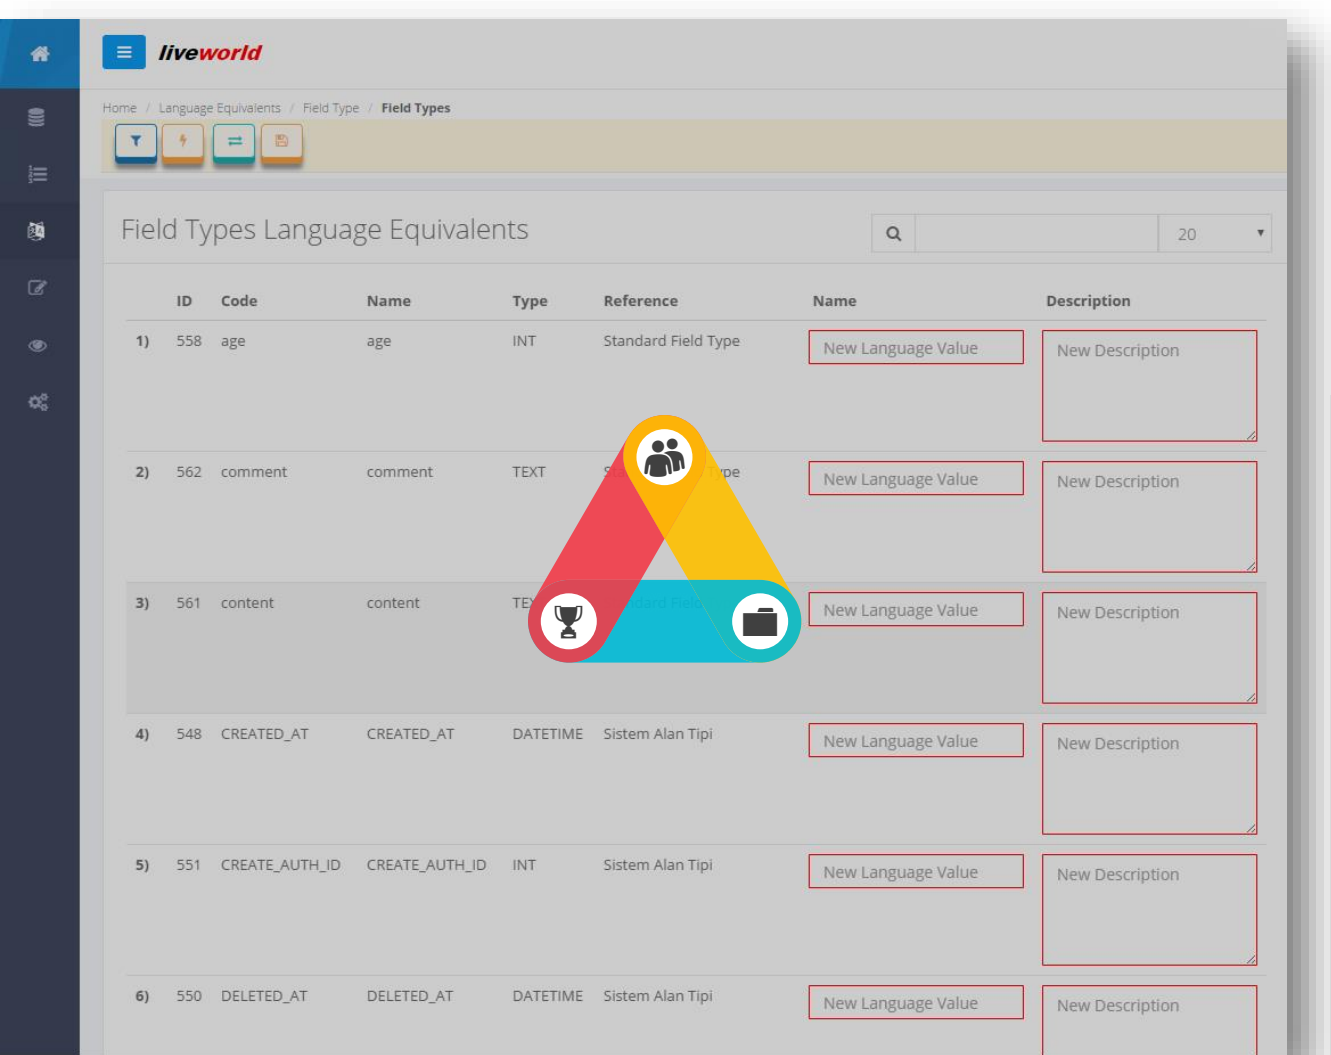

Multiple Region Validation Support

Polisoft Liveworld® Multiple Region Validation Support feature enables you to develop and create forms, wizards and related components by using regional specifications, rules, terms and conditions.

Reaching out wider markets?

No problem!

Polisoft Liveworld® Multiple Language Data Control System enables you to add new languages to forms, wizards and other related components thus you will be able to develop software in different languages.

Whenever you need, you can integrate new languages into your projects in no time.

Powerful Log Tracking System

We can easily see, track and search all users' actions such as database modifications, user document interactions, sensitive data operations and viewed screens and data.

Also automatically generated system actions can be seen in Polisoft Liveworld® Powerful Log Tracking System.

You will easily know who did what and when...

The screenshot shows the 'User Logs' page in the Polisoft Liveworld application. The interface includes a navigation sidebar on the left with icons for home, menu, and settings. The main content area has a breadcrumb trail: Home / User Settings / User Logs. Below the breadcrumb are two action buttons: a filter icon and a refresh icon. A 'Filter' section contains several dropdown menus: 'Data Count' (set to 20), 'Project' (set to '5 item selected'), 'User Group' (set to 'All'), 'Log Type' (set to '4 item selected'), 'Start Date' (set to '23.05.2017'), 'End Date' (set to '23.05.2017'), and 'Order By' (set to 'Date [Z-A]'). Below the filter section is a 'User Logs' table with a search bar on the right. The table has columns for '#', 'User', 'Project', 'Type', and 'Operation'. It displays three log entries for the user 'EGEHAN ARICI'.

#	User	Project	Type	Operation
1)	EGEHAN ARICI		Update	egehan user is updated
2)	EGEHAN ARICI	ozgur	Insert	Added a new permission to Project Manager user role.
3)	EGEHAN ARICI	ozgur	Insert	Added a new permission to Project Manager user role.

Polisoft Liveworld® is a platform where you can work by comparing your databases on Test and Real environments thus it allows you to have full control over your data. With this feature, Polisoft Liveworld® also offers a wide range of updating options for your software projects.

Home / Database

Table Comparison

Sales Table	TEST	Sales Table	REAL
1)	customer_id INT 11	1) customer_id INT 1	
2)	stock_detail INT 11	2) stock_detail INT 1	
3)	title VARCHAR 30	3) title VARCHAR 3	
4)	description TEXT -	4) description TEXT -	
5)	personel_id INT 11	5) personel_id INT 1	
6)	unit VARCHAR 5	6) unit VARCHAR 5	
7)	warehouse_id INT 11	7) warehouse_id INT 1	

Polisoft Software Ltd.

“A creative and dynamic company with 16 years' experience which doesn't want you to go through what it went through and wants to make life easier for you.”

Polisoft Software Ltd. is based in London and focuses on IT & Software Solutions in all European countries and manages custom made multiple projects.
